JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Additivity of currents
The additivity of catalyzed hydrogen evolution currents of hemoglobins: an empirical approach (Kuik) 37
Adsorption
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1
An electrochemical study of the photolysis of adsorbed flavins (Birss et al.) 13
SERS investigation of the adsorption and electroreduction of 4-cyanopyridine on a silver electrode (Shi et al.) 67
Adsorption effects of electroactive species in d.c. polarography demonstrated in the case of the anodic waves of cysteine (Heyrovský, Vavřička) 125
Adsorptive transfer stripping voltammetry
Adsorptive stripping square-wave voltammetry of DNA (Jelen et al.) 141
Ammonium amalgam
Ammonium–mercury, electrogeneration and properties (Kariv-Miller et al.) 87
Anion radicals
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131
Aprotic media
Reduction of hydrazones of aromatic carbonyl compounds in aprotic media (Soucaze-Guillous, Lund) 109
Aromatic carbonyls
Reduction of hydrazones of aromatic carbonyl compounds in aprotic media (Soucaze-Guillous, Lund) 109
Aromatic nitrocompounds
Electroreduction of 3-nitrophthalic acid on mercury electrodes in water hexamethylphosphortriamide (HMPA) mixtures (Kalandyk et al.) 103
As(III)
Titration of As(III) with electrogenerated iodine in the diffusion layer of an interdigitated microelectrode array (Tomčík et al.) 115

9,10-Bis(dimethylamino)anthracene
Electron-transfer reactions accompanied by substantial structural changes: oxidation of 9,10-bis(dimethylamino)anthracene and 3,6-bis(dimethylamino)durene (Hu, Evans) 29
3,6-Bis(dimethylamino)durene
Electron-transfer reactions accompanied by substantial structural changes: oxidation of 9,10-bis(dimethylamino)anthracene and 3,6-bis(dimethylamino)durene (Hu, Evans) 29

Catalysis
The additivity of catalyzed hydrogen evolution currents of hemoglobins: an empirical approach (Kuik) 37
Cathodic reduction
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131
Cleavage rate
Reduction of hydrazones of aromatic carbonyl compounds in aprotic media (Soucaze-Guillous, Lund) 109
Complex formation
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1
Conducting polymers
A spectroelectrochemical study of poly(dithienothiophenes) (Arbizzani et al.) 23
Co_3O_4
Surface characterization of Co_3O_4 electrodes prepared by the sol–gel method (Spinolo et al.) 49
4-Cyanopyridine
SERS investigation of the adsorption and electroreduction of 4-cyanopyridine on a silver electrode (Shi et al.) 67
Cysteine
Adsorption effects of electroactive species in d.c. polarography demonstrated in the case of the anodic waves of cysteine (Heyrovský, Vavřička) 125

D.C. polarography
Adsorption effects of electroactive species in d.c. polarography demonstrated in the case of the anodic waves of cysteine (Heyrovský, Vavřička) 125
Denatured DNA
Adsorptive stripping square-wave voltammetry of DNA (Jelen et al.) 141
Didodecyldimethylammonium bromide
Films of hemoglobin and didodecyldimethylammonium bromide with enhanced electron transfer rates (Lu et al.) 59
Differential pulse voltammetry
Voltammetric determination of a pesticide, sulfometuron methyl, via its N-chloroderivative (Drevinek, Horak) 83
Diffusion
Titration of As(III) with electrogenerated iodine in the diffusion layer of an interdigitated microelectrode array (Tomčík et al.) 115
n-Doping
A spectroelectrochemical study of poly(dithienothiophenes) (Arbizzani et al.) 23

Electroactive
Adsorption effects of electroactive species in d.c. polarography demonstrated in the case of the anodic waves of cysteine (Heyrovský, Vavřička) 125
Electrocatalysis
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119
Electrochemistry
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1
An electrochemical study of the photolysis of adsorbed flavins (Birss et al.) 13

Electrode reaction
Electroreduction of 3-nitrophthalic acid on mercury electrodes in water hexamethylphosphortriamide (HMPA) mixtures (Kalandyk et al.) 103
Electron transfer
Films of hemoglobin and didodecyldimethylammonium bromide with enhanced electron transfer rates (Lu et al.) 59
Electron-transfer reactions
Electron-transfer reactions accompanied by substantial structural changes: oxidation of 9,10-bis(dimethylamino)anthracene and 3,6-bis(dimethylamino)durene (Hu, Evans) 29
Electro-oxidation
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119
Electroreduction
SERS investigation of the adsorption and electroreduction of 4-cyanopyridine on a silver electrode (Shi et al.) 67
Electroreduction of 3-nitrophthalic acid on mercury electrodes in water hexamethylphosphortriamide (HMPA) mixtures (Kalandyk et al.) 103
Electrosynthesis
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1

Films
Films of hemoglobin and didodecyldimethylammonium bromide with enhanced electron transfer rates (Lu et al.) 59
Flavins
An electrochemical study of the photolysis of adsorbed flavins (Birss et al.) 13
Fullerene
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131

Gold
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119

Hemoglobin
Films of hemoglobin and didodecyldimethylammonium bromide with enhanced electron transfer rates (Lu et al.) 59
Hemoglobins
The additivity of catalyzed hydrogen evolution currents of hemoglobins: an empirical approach (Kuik) 37
Hydrazones
Reduction of hydrazones of aromatic carbonyl compounds in aprotic media (Soucaze-Guillous, Lund) 109
Hydrogen ion
Voltammetric reduction of hydrogen ion in solutions of polyprotic strong acids with and without supporting electrolyte (Ciszkowska et al.) 95

Interdigitated microelectrode array
Titration of As(III) with electrogenerated iodine in the diffusion layer of an interdigitated microelectrode array (Tomčík et al.) 115
Iodine
Titration of As(III) with electrogenerated iodine in the diffusion layer of an interdigitated microelectrode array (Tomčík et al.) 115

Mercury
Ammonium–mercury, electrogeneration and properties (Kariv-Miller et al.) 87
Mercury electrodes
Adsorptive stripping square-wave voltammetry of DNA (Jelen et al.) 141
Mixed solvents
Electroreduction of 3-nitrophthalic acid on mercury electrodes in water hexamethylphosphortriamide (HMPA) mixtures (Kalandyk et al.) 103

Native DNA
Adsorptive stripping square-wave voltammetry of DNA (Jelen et al.) 141
N-chloroderivative
Voltammetric determination of a pesticide, sulfometuron methyl, via its N-chloroderivative (Drevinek, Horak) 83
Noble metals
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119

Organic compounds
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119
Organic diselenides
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1
Oxidation
Electron-transfer reactions accompanied by substantial structural changes: oxidation of 9,10-bis(dimethylamino)anthracene and 3,6-bis(dimethylamino)durene (Hu, Evans) 29

Pesticides
Voltammetric determination of a pesticide, sulfometuron methyl, via its N-chloroderivative (Drevinek, Horak) 83
Photochemistry
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131
Photolysis
An electrochemical study of the photolysis of adsorbed flavins (Birss et al.) 13
Polarographic hydrogen evolution
The additivity of catalyzed hydrogen evolution currents of hemoglobins: an empirical approach (Kuik) 37
Poly(dithienothiophenes)
A spectroelectrochemical study of poly(dithienothiophenes) (Arbizzani et al.) 23
Polyprotic acid
Voltammetric reduction of hydrogen ion in solutions of polyprotic strong acids with and without supporting electrolyte (Ciszkowska et al.) 95
Properties
Ammonium–mercury, electrogeneration and properties (Kariv-Miller et al.) 87

Quinodimethane adducts
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131

Reduction mechanisms
Electrochemistry and metal complex formation of organic diselenides (Ludvík, Nygård) 1

Silver
The electrocatalytic properties of the oxides of noble metals in the electro-oxidation of some organic molecules (Avramov-Ivić et al.) 119
Silver electrode
SERS investigation of the adsorption and electroreduction of 4-cyanopyridine on a silver electrode (Shi et al.) 67

Sol–gel
Surface characterization of Co_3O_4 electrodes prepared by the sol–gel method (Spinolo et al.) 49
Spectroscopy
Anion radicals of [60]-fullerene and its *ortho*-quinodimethane adducts generated by cathodic reduction and photochemical electron transfer: an EPR and vis–near-IR study (Staško et al.) 131
Square-wave voltammetry
Adsorptive stripping square-wave voltammetry of DNA (Jelen et al.) 141
Structural change
Electron-transfer reactions accompanied by substantial structural changes: oxidation of 9,10-bis(dimethylamino)anthracene and 3,6-bis(dimethylamino)durene (Hu, Evans) 29
Sulfometuron methyl
Voltammetric determination of a pesticide, sulfometuron methyl, via its N-chloroderivative (Drevinek, Horak) 83
Surface-enhanced Raman scattering
SERS investigation of the adsorption and electroreduction of 4-cyanopyridine on a silver electrode (Shi et al.) 67
Surface properties
Surface characterization of Co_3O_4 electrodes prepared by the sol–gel method (Spinolo et al.) 49
Symmetrical electrochemical devices
A spectroelectrochemical study of poly(dithienothiophenes) (Arbizzani et al.) 23

Titration
Titration of As(III) with electrogenerated iodine in the diffusion layer of an interdigitated microelectrode array (Tomčík et al.) 115
Transport model
Voltammetric reduction of hydrogen ion in solutions of polyprotic strong acids with and without supporting electrolyte (Ciszkowska et al.) 95

Voltammetric reduction
Voltammetric reduction of hydrogen ion in solutions of polyprotic strong acids with and without supporting electrolyte (Ciszkowska et al.) 95
Voltammogram simulation
Voltammetric reduction of hydrogen ion in solutions of polyprotic strong acids with and without supporting electrolyte (Ciszkowska et al.) 95
